

River and Wetland Health & Floodplain Management Program

2012-13 Implementation Program

This year the Goulburn Broken Catchment Management Authorities (CMA) River and Wetland Health & Floodplain management program 2012-13 Implementation Program has a number of projects targeting improvement in the health of our region's waterways and wetlands. Please see below a list of current projects, projects description, projects timeline and contact details.

Project title	Description	Timeline	Contact
Northern plains wetland and remnant vegetation protection	Fencing and management incentives are available for private landholders to protect wetlands and remnant native vegetation in the northern plains area of the catchment.	2012-13	Jim Castles: (03) 5820 1100
Holland Creek Demonstration Reach	The project focuses on protecting and expanding suitable habitat for the endangered Macquarie Perch along a reach of the Holland Creek. Stream side fencing, revegetation and off stream watering incentives are available for landholders along the reach. For further information see; www.gbcma.vic.gov.au/hollandscreek/	2012-13	Stephen Collins: (03) 5761 1547
King Parrot Creek Project	The project aims to improve the health of the King Parrot Creek and protect and expand Macquarie Perch habitat. There will be opportunities for community members to be involved as well as landholders with frontage to the King Parrot Creek for stream side fencing, revegetation and off stream watering.	2012-13 to 2015-16	Sue Kosch or Kirsten Roszak (03) 5736 0100
Yea River	The project aims to improve the health of the Yea River and protect and expand Macquarie Perch habitat. Opportunities exist for communities members to be involved as well as landholders with frontage to Yea River for stream side fencing, revegetation and off stream watering.	2012-13 to 2015-16	Kirsten Roszak (03) 5736 0100
