

GB CMA Workshop:

“Modelling Groundwater / Salinity under Climate Change”

Held on 18th November 2008 at The Connection, The Causeway between Shepparton and Mooroopna (formerly known as Makaby's).

World leaders in resilience thinking, Dr **Brian Walker** and Dr **Nick Abel** (Resilience Alliance Board Chair and Board Member respectively), guided the workshop.

Objectives of the workshop:

- To share current thinking on groundwater / salinity issues, including changed rainfall and in-flow patterns under climate change.
- To identify the usefulness of a minimal modelling technique under climate change.

Note that a separate general workshop on “resilience” was held in the morning.

Participants:

MODELLING GROUNDWATER / SALINITY UNDER CLIMATE CHANGE

Bill O’Kane
Bill Trehwella
Brian Walker
Chris McAuley
Craig Beverley
James Burkitt
Jane Ryan
Kate Brunt
Keith Collett
Ken Sampson
Louissa Roger
Mark Cotter
Nick Abel
Pat Feehan
Peter Alexander
Rick Felton
Rod McLennan
Ross Plunkett
Terry Hunter
