

Waterway Partnership Proposals Call for Expressions of Interest

This Expression of Interest (EOI) process aims to enhance riparian condition in urban environments and support community interaction and appreciation of local waterways.

Working in partnership with the community and land managers, the GB CMA will contribute riparian management expertise to the implementation of on-ground work projects, including but not limited to pest plant control, access enhancement, signage and bank erosion. The intention is to support project works that address key waterway issues and/or that complement other site improvements.

Prioritisation approach

EOI proposals received will be prioritised with consideration to the **environmental outcomes** to be achieved for the waterway as well as **cost share**, **community support** and **longevity** of the project works.

Who can apply?

EOIs are sought from land managers and community groups with capacity to co-fund or offer in-kind labour with complementary activities. Successful proposals will utilise a small budget (around \$20K annually) for GB CMA delivery of coordinated works and engagement events.

Any waterway in an urban environment or public space within the Goulburn Broken catchment is eligible.

All enquires can be directed to Christine Glassford on 0419 567 461 or christineg@gbcma.vic.gov.au

How to apply

Please answer the questions in the available template. We will investigate each submission to assess project suitability based on the prioritisation criteria, delivery capacity and estimate cost. Please include a map detailing the location of proposed project works (or relevant GPS reference).

EOI are to be sent to reception@gbcma.vic.gov.au

This EOI process is a component of GB CMA's Riparian On-Ground Works projects, funded by the Victorian Government.

Urban Waterway Works - EOI

Applicant name/s: _____

Email: _____

Phone: _____

Project title: _____

1. What are the intended outcome of this project? Detail the activities and describe the changes anticipated. Clearly state what GB CMA delivered works are sought as part of this project.

Area (ha): _____ Stream length (m): _____ Both banks, right or left bank (view downstream)

2. Who and how are others involved in delivery of this project?

3. What are others contributing? In-kind and/or financially, with suggested delivery timeframes.

4. What long-term maintenance measures are in place? Who and how is this resourced?

5. Who are the beneficiaries? Estimate number of people and groups affected and how they will be engaged.

Please attach a map of project location, or provide GPS reference: latitude _____ longitude _____
