

Erosion control in the Mount Camel Range using native vegetation.

Come along and hear how a farmer from Cornella has planted native vegetation to reduce the hillside erosion on the Mount Camel Range adjacent to his vineyard.

Date: Thursday 1st April 2021

Where: Toolleen Victoria.

Details of where we will meet will be sent via email prior to the event.

Time: 1pm – 2.00pm

Registration is mandatory for this workshop due to COVID restrictions. Attendance will be limited to 20 people.

If you are unwell, awaiting results of a COVID test or have been in a hotspot, please do not attend this event.

To attend the event click [on this link](#) to register for this workshop.

Or contact Karen on 0409 955 396 or email karenb@gbcma.vic.gov.au

Please bring sturdy walking shoes, a drink and hat.

Colin Neate owns a vineyard on the side of the Mount Camel Range. When he noticed erosion occurring in the gullies, he decided to 'kill two birds with one stone'. By hand-planting native shrubs in his gullies on the range, he has been able to stop the erosion and create habitat for small insect-eating birds. Colin's other aim was to attract birds of prey to scare away the fruit-eating birds.
