

# Demystifying integrated pest and disease management

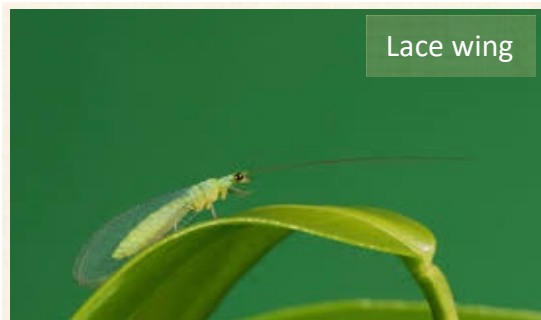

Hover flies as pollinators

A wasp, laying its eggs in an aphid

Lace wing

Parasitic wasp

Hover fly

Elizabeth Mace from GV Crop Protection will share her knowledge about integrated pest and disease management. The focus of the talk will be on flying insects that can help you on the farm.

**Date:** Tuesday 16<sup>th</sup> June 2020

**Meeting place:** online

**Time:** 1.00pm – 2.00pm

This event will be run via Teams (webinar). After you have registered for the workshop a link will be sent to you the Friday before the workshop with instructions on how to join the webinar.

Integrated pest and disease management and the role beneficial insects play in the system is a very broad subject to cover in hour. For this workshop we will look at flying insects with a focus on hover flies.

Presenter Elizabeth Mace will also discuss how you can attract hover flies and other flying insects to your farm using simple methods to help you control pest insects cheaply.
