

# CONTROLLING FOX & RABBIT POPULATIONS ON YOUR PROPERTY

Many landholders in the Upper Goulburn region endure the destruction rabbit and fox populations wreak on food production, sown pastures and native flora and fauna. These pests also devastate backyard gardeners and chook owners. Register for our free webinar to find out what you can do to manage these animals.

Richard Francis, Abzeco, will be sharing his knowledge and experience on rabbit and fox control methods including baiting, trapping, biological control, fumigation, shooting, warren destruction and exclusion fencing.

**DATE: TUESDAY 15TH SEPTEMBER**

**TIME: 10AM**
