#### Introduction

A variety of native plants within the City of Greater Shepparton region are very suitable for use in gardens.

The following list provides a selection of indigenous plants found in our region. Indigenous plants are those that occur naturally in a local area.

We hope the use of native plants in local gardens will develop an appreciation and understanding of natural biodiversity in the region.

Shepparton has a number of specialist native plant nurseries where plants and advice can be obtained.

To ensure successful establishment of plants it is important to match plant variety with aspect, drainage and soil type characteristics of your site.

# Benefits of indigenous species include:

- Adaptation to the local climate, soil type and tolerance of drought and frost.
- Attract native fauna to the garden by providing a source of food and shelter.
- Local plants do not 'escape' from gardens to become environmental weeds.
- Require less water and fertiliser than many exotic species. Reducing water and fertiliser application reduces salinity and limits the amount of nutrients entering natural waterways.
- Contribute to wildlife corridors that enable wildlife to move from one forest area to another.
- By planting native plants in your garden you will assist in the preservation of the natural landscape and enhance natural biodiversity.

Acacia salicina Callitris glaucophylla Eucalyptus albens Eucalyptus camaldulensis \* Eucalyptus melliodora Eucalyptus microcarpa

Eucalyptus polyanthemos

10 - 30 metres

River Cooba - Native Willow White Cypress Pine White Box River Red Gum Yellow Box **Grey Box** Red Box

All of the above are large trees > 10 metres, therefore are suitable only for large gardens and farms.

# **SMALL TREES**

Acacia dealbata \* Acacia implexa Acacia pendula Allocasuarina luehmannii

#### 5 - 10 metres

Silver Wattle Lightwood Wattle Buloke Weeping Boree

3 - 5 metres

## LARGE SHRUBS

Acacia brachybotrya Grev Mulga **Drooping Wattle** Acacia difformis Acacia pycnantha Golden Wattle Banksia marginata Silver Banksia Bursaria spinosa Native Blackthorn Callistemon sieberi \* River Bottlebrush Pittosporum phylliraeoides Weeping Pittosporum

# **SMALL SHRUBS**

## 1 - 3 metres

Great for making formal hedges

Gold-dust Wattle Acacia acinacea Spreading Wattle Acacia genistifolia Acacia hakeoides Hakea Wattle Acacia montana Mallee Wattle Acacia verniciflua Varnish Wattle Cassinia arcuata Drooping Cassinia Daviesia ulicifolia Gorse Bitter-pea Dodonaea viscosa ssp. cuneata Wedge-leaf Hop-bush Eutaxia microphylla Common Eutaxia Maireana microphylla Eastern Cotton Bush Myoporum montanum \* Waterbush Rhagodia spinescens Hedge Saltbush

#### **GRASSES**

Austrodanthonia caespitosa Austrostipa elegantissima Microlaena stipoides Poa labillardieri Themeda triandra

Common Wallaby Grass Feather Spear Grass Weeping Grass Common Tussock Grass Kangaroo Grass

# **GROUND COVERS**

Atriplex semibaccata Convolvulus erubescens Finadia nutans Enchylaena tomentosa

Creeping Saltbush Blushing Bindweed **Nodding Saltbush** Ruby Saltbush

# SMALL PLANTS

Arthropodium strictum Calocephalus citreus Chrysocephalum apiculatum Chrysocephalum semipapposum Clustered Everlasting Daisy Craspedia glauca \* Dianella revoluta Eryngium ovinum Helichrysum rutidolepis Pycnosorus globosus \* Swainsona procumbens \* Wahlenbergia communis

Chocolate Lily Lemon Beauty Heads Yellow Buttons

Common Billy Buttons Black-anther Flax-lily

Blue Devil

Pale Everlasting Daisy

**Drumsticks** Broughton Pea Tufted Bluebell

The above species would be best suited to a mass planting formation and may be successfully used in cottage style gardens.

These plants are best suited to moist and water-loaded

# Local Native Alternatives to Commonly Grown Weed Species

## **TREES**

Weed Species	Common Name	Native Alternative
Fraxinus rotundifolia	Desert Ash	Euc. polyanthemos
Schinus molle	Peppercorn	Euc. microcarpa
Salix spp.	Willow	Callistemon seiberi Acacia dealbata Acacia salicina

#### SHRUBS/GROUNDCOVERS

Weed Species	Common Name	Native Alternative
Acacia baileyana	Cootamundra Wattle	Acacia pycnantha Acacia implexa
Crataegus monogyna	Hawthorn	Acacia paradoxa Bursaria spinosa
Cotoneaster divaricata	Cotoneaster	Dodonea viscosa ssp.cuneata
Genista monspessulana	Montpellier Broom	Acacia verniciflua Acacia acinacea
Agapanthus orientalis	Africa Lily	Dianella revoluta
Hedera helix	lvy	Hardenbergia violaceae Einadia nutans Enchylaena tomentosa
