

Family farmers everywhere struggle to  
earn a decent living

How do we treat our animals?

Healthy food for healthy people

Food is less affordable for many people

A billion people, mostly rural women and  
children, are starving or malnourished

A global pandemic of 400 million obese  
and diabetic people is spreading fast

Agriculture and food production create  
around 33% of greenhouse gas emissions

Agriculture is a major factor  
in the mass extinction of other species.

the resources on which industrial  
farming depends are in sharp decline.

Climate change

It is no wonder that we are running out of farmers and yet I meet people everyday that want to  
be farmers but cant.

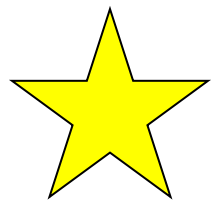

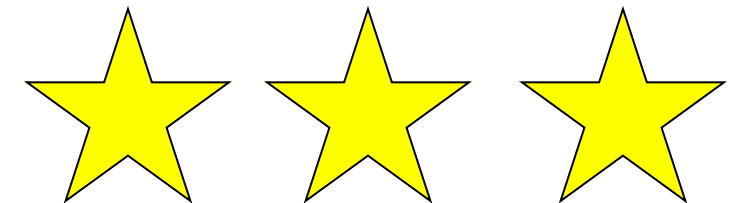

**EXTERNAL ENERGY**

ONE STAR ENERGY – INDUSTRIAL ENERGY - GETTING MORE EXPENSIVE, ENVIRONMENTAL PROBLEMS ETC .

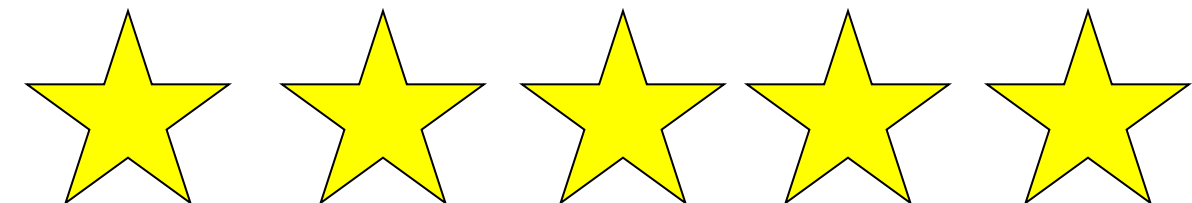

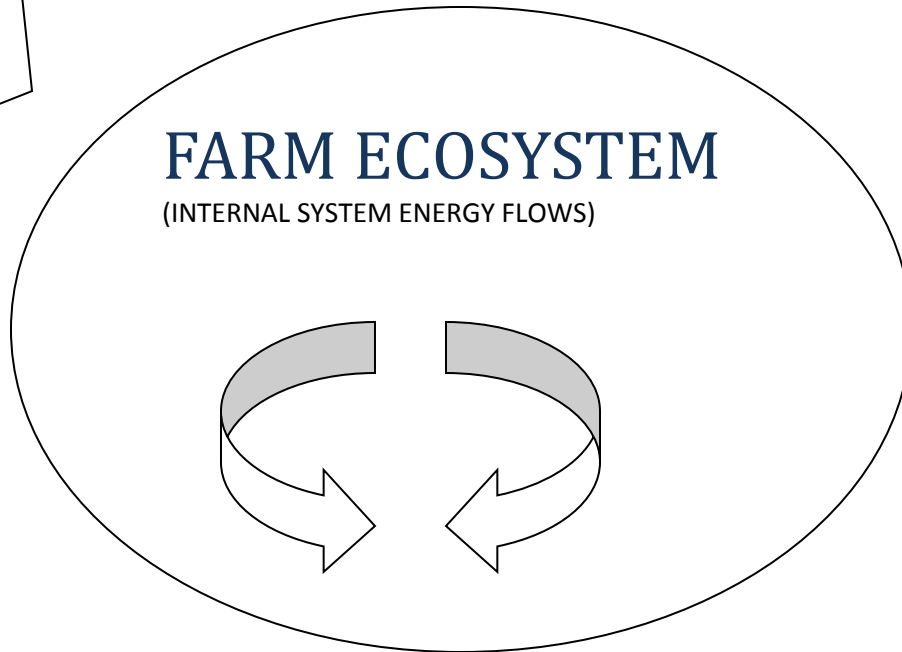

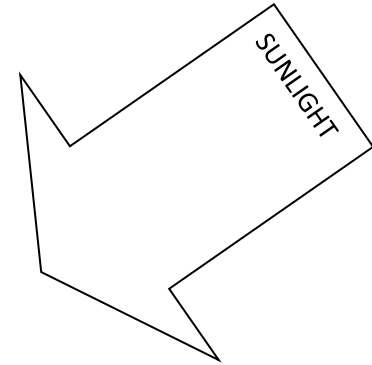

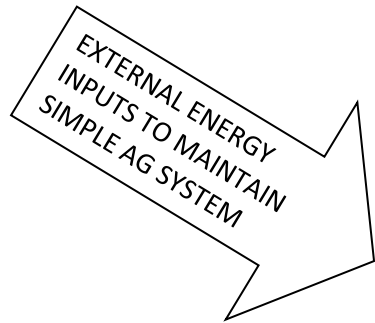

THREE STAR ENERGY – CULTURAL ENERGY – EXPENSIVE, HARD WORK BETTER THINGS TO DO

**FARM ECOSYSTEM ENERGY**

FIVE STAR ENERGY – FARM ECOSYSTEM ENERGY DESIGNED INT THE SYSTEM

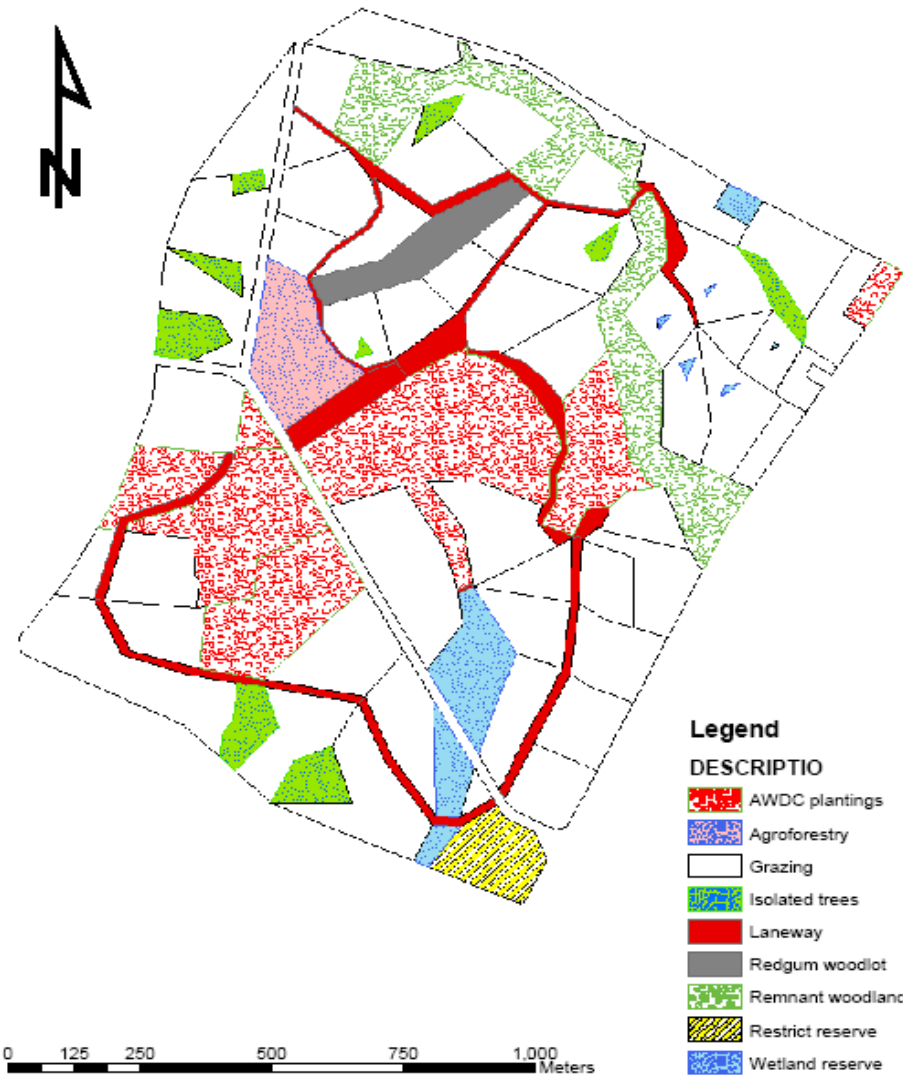

## National Environment Centre habitat groups

Family farmers everywhere struggle to  
earn a decent living
