 Cadastral and topographic information supplied by the Goulburn Broken Catchment Management Authority.

- NOTES REGARDING DECLARATION OF FLOOD LEVELS**
- The flood level lines shown on this plan define the surface level of the "1% probability flood". This is the flood prescribed by Sec 204 of the Water Act - 1989 for floodplain management purposes and has a 1 in 100 chance of being equalled or exceeded in any one year.
 - The derivation of these 1% Flood level lines has been based on available historical flood level and flow information, hydrologic and hydraulic modelling.
 - Areas outside the 1% probability flood limit may be inundated by rarer flood events.
 - For the purpose of determining flood levels for locations between flood level lines, it can be assumed that the flood surface levels change at a uniform rate between flood level lines.
 - The flood level lines shown on this plan can be used to assist in the determination of designated levels in accordance with current Building Regulations.

6. Although there may be buildings within the area covered by the flood level lines, it should not be assumed that the floor of any individual building is below flood level. Buildings should be surveyed to determine whether their floors are above or below the 1% flood level.

7. The flood levels were declared by the **Goulburn Broken Catchment Management Authority** under the provisions of Water Act 1989 Clause 203 on **18 January 2007**.

- LEGEND**
- 103.8** 1% Flood Contours (m AHD) (contour interval 200mm)
 - PROPOSED**
 - Floodway Overlay
 - Land Subject to Inundation Overlay
