

GENERAL NOTES

1. WBM Oceanics Australia has prepared this document in accordance with the instructions of the Greater Shepparton City Council and the Goulburn Broken Catchment Management Authority, for their specific use.
2. The concepts and information contained in this document are the copyright of the Greater Shepparton City Council.
3. Use or copying of the document in whole or in part without written permission of the Greater Shepparton City Council constitutes an infringement of copyright.
4. The Greater Shepparton City Council and the Goulburn Broken Catchment Management Authority does not warrant that this document is definitive nor free of error and does not accept liability for any loss caused or arising from reliance upon information presented within.
5. Cadastral and topographic information have been supplied by Greater Shepparton City Council.
6. This map has been prepared using the best available data and computer modelling and mapping techniques. The accuracy of this map however, is not absolute and reflects only the accuracy of the data and techniques used.
7. This map is a compilation of 100 year ARI flood model results and existing flood overlay maps.
8. WBM Oceanics Australia does not warrant that this map is definitive nor free of error and does not accept liability for any loss caused or arising from reliance upon information provided herein.

NOTES REGARDING DECLARATION OF FLOOD LEVELS

1. The flood level lines shown on this plan define the surface level of the "1% probability flood". This is the flood prescribed by Section 204 of the Water Act 1989, for floodplain management purposes and has a 1 in 100 chance of being equalled or exceeded in any one year.
2. The derivation of these 1% flood level lines has been based on available historical flood level and flow information, hydrologic and hydraulic modelling.
3. Areas outside the 1% probability flood limit may be inundated by rarer flood events.
4. For the purpose of determining flood levels for locations between flood level lines, it can be assumed that the flood surface levels change at a uniform rate between flood level lines.
5. The flood level lines shown on this plan can be used to assist in the determination of designated levels in accordance with Clause 6.2 of the Building Regulations - 1994.
6. Although there may be buildings within the area covered by the flood level lines, it should not be assumed that the floor of any individual building is below flood level. Buildings should be surveyed to determine whether their floors are above or below the 1% flood level.
7. The flood levels were declared by the Goulburn Broken CMA under the provisions of Water Act 1989 Section 203 on 18 January 2007
